

## View Saved Property Search

### Quick Start Guide Paragon Desktop 4.0

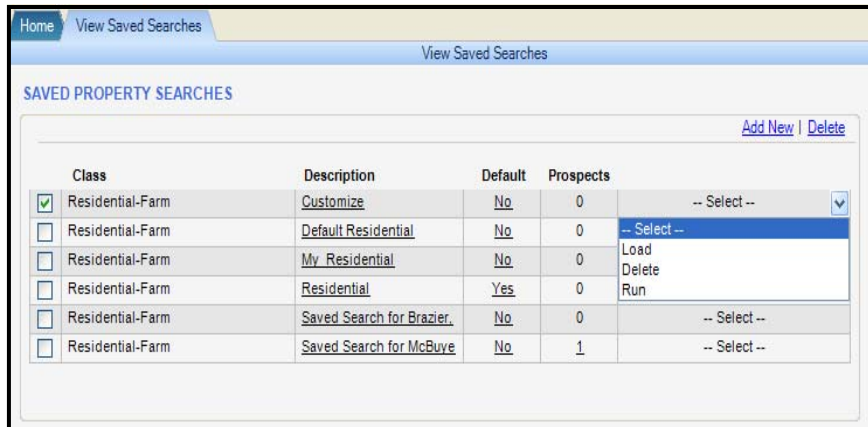

Saving Searches saves you valuable time. To retrieve a saved search click on the Search drop down menu and pick View Saved Property Searches or pick the Saved Property search from the Bottom left side of the screen.

Clicking on the search from Saved Searches loads that search.

When choosing **View Saved Property Searches** from the Search drop down menu, you can click on **Select** on the right side of the search you wish to work with, you can **Load**, **Delete** or **Run** the search.

This screen will also show the Class, the Description, whether a search is set as Default and whether or not any Prospects have been associated to the search.

Class	Description	Default	Prospects		
<input checked="" type="checkbox"/>	<a href="#">Residential-Farm</a>	<a href="#">Customize</a>	No	0	-- Select --
